# Connecting and Configuring Compulite Lighting Consoles and *Capture*

## 1.0 *About Compulite consoles and Capture*

- Pre Program a show with the Vector, Dlite, Rave, Sabre and 4D consoles connected via Ethernet to a computer running Capture's software.
- Link a console PC edition with Capture for visualizing cues.
- Capture software can listen to Compulite VCs without any special configuration.

## 1.1 *Work flow*

1. In case both Compulite's software and Capture are installed on the same machine:
  - a. There is nothing to configure. Enable VC in Compulite's software and input to Capture software will be automatically.
2. In case Compulite's software and Capture are installed on different machines:
  - a. Make sure both machines under the same network\subnet.  
Example: If console IP is 90.10.10.1 the PC LAN (local area network) must be configured manually to 90.##.##.## and the subnet mask must be 255.0.0.0.
3. In order to Control Capture through Compulite's consoles:
  - a. Create and Patch a show in both Compulite's and Capture's software.
  - b. Enable VC on Compulite's consoles or Offline software.
  - c. Run Capture.
  - d. Run cues on Compulite's software to see it live on Capture.

## 1.2 *Requirements*

1. Any Compulite's Consoles\Offline software that transmits VC.
2. Capture Polar software

## 2.0 *Installing Capture and Compulite Software*

1. For downloading Compulite Software:
